

Holdings Registration Subscription

Thank you for your interest in the OCLC Cooperative! As an alternative to a WorldCat Cataloging subscription, we offer a service that enables your library to register holdings in WorldCat. A Holdings Registration Service subscription will register collection holdings in WorldCat for lending to OCLC members WorldShare ILL, analyzing your collection using OCLC's Collection Evaluation service, and making your library's holdings visible in WorldCat.org. The Holdings Registration Service includes the following:

Registering Bibliographic and Holdings Data:

- OCLC will process records to set holdings via standard ongoing single batchload with MARC21 input.
- OCLC will use a list of numeric data to match against WorldCat records for canceling holdings. Your institution may provide OCLC with files using OCLC#, ISBN, ISSN, or LCCN as identifiers.

OCLC will provide reports to your institution:

- A standard cross reference report which includes the ILS system number in one column and the OCLC# in another.
- Reports summarizing the results of processing for each file.

Other services provided by OCLC:

- OCLC will archive the records submitted for the Holdings Registration Service.

Your subscription will include data management, record enhancement and stewardship services for your Institution's WorldCat records.
